

# POL-GLASS MEANS FUN

**WATER IS OUR PASSION.  
AMUSEMENT - OUR ULTIMATE GOAL.  
WE MAKE WATER TOYS TO BRING  
THE TWO TOGETHER.**

Founded in 1989, based in Poland, Pol-Glass has been making people smile for more than 22 years. With more than two decades of experience in designing and manufacturing water slides, pool toys and complete playgrounds, we know what it takes to have fun in a water park or at a swimming pool. Our expertise has been recognised with many industry awards, including the „Teraz Polska” emblem – one of the most prestigious business awards in Poland.

More than 20 thousand metres of water slides, nearly 300 installations and business partners in 15 countries are the facts and figures about our business. However, what we are most proud of are the unforgettable experiences we give and the millions of smiles we bring to people’s faces. For 22 years, we have been here to keep you amused!

## ONLY IMAGINATION SETS THE LIMITS

The real fun starts where your imagination takes charge. Size, shape, colour, functions – feel free to design your original water toy within the limits of your imagination! You can choose from tens of ready-made designs in Pol-Glass’s catalogue of water toys; however, custom designs are the real challenge. With 22 years of industry experience and state-of-the-art technologies, we are capable of making any design a reality, from water toys through water slides to complete playgrounds. And all this to meet the expectations of our business partners and give fun to end-users. We understand that unique solutions and flexibility with clients lie at the core of today’s business.

## CAREFREE AND SAFE

Enthusiastic and committed to gain the trust of our clients, we look after children’s safety and carefree pleasure. End-users’ safety is an absolute priority at Pol-Glass. By eliminating any possible risks, we create an optimal environment for relaxation and amusement. Most of our products are made for children, and we want them to be carefree and safe. Safety has always been our main focus when designing, manufacturing and installing water toys.
